

U.M. DEEKSHITH GOWDA

Software Developer | Generative AI Engineer

+91 7892879860 | gdeekshith80@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

Professional Summary

Computer Science undergraduate and Software Developer with industry experience at Bosch Limited developing React frontends and Java Spring Boot RESTful APIs. Hands-on experience building Generative AI applications, RAG pipelines, LLM-based systems, NLP workflows, and document intelligence solutions. Strong foundation in software engineering, databases, and full-stack development.

Experience

Bosch Limited

Software Developer Intern

9 Aug 2026 – Present

Bengaluru, India

- Developed internal software applications using React, JavaScript, and Vite, creating reusable UI components and workflows used by Bosch employees.
- Developed and tested RESTful APIs using Java and Spring Boot, implementing layered architecture with controllers, services, and repositories.
- Worked with MySQL databases and implemented application data access using Spring Data JPA, SQL, and Maven-based project configuration.
- Integrated frontend and backend components end-to-end, debugging API integration, data-flow, and application issues using Eclipse, VS Code, and GitHub.

Technical Skills

Programming Languages: Java, JavaScript, C

Frontend Development: React, Next.js, HTML, CSS, TailwindCSS, Vite

Backend Development: Spring Boot, Spring Data JPA, Express.js, FastAPI, RESTful APIs

AI & Generative AI: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), FAISS, Prompt Engineering, Groq API

Databases: MySQL, SQL, MongoDB, PostgreSQL

Development Tools: Eclipse, VS Code, GitHub, GitHub Actions, Maven, CI/CD

Projects

DocMind AI | [GitHub](#)

Completed

FAISS, HuggingFace, Groq, LLaMA 3.3, Streamlit

- Built an end-to-end Retrieval-Augmented Generation (RAG) platform for citation-backed question answering over long-form PDF documents, reducing manual review time by ~70% for test users.
- Implemented semantic document chunking and FAISS vector search with Groq-hosted LLaMA 3.3 (70B), improving answer relevance by ~40% over baseline.

RedTape | [GitHub](#)

Active

Next.js, React, TypeScript, FastAPI, Python, Tailwind CSS

- Co-developed an AI-powered legal document analysis platform for automated contract review, clause extraction, and document intelligence, reducing review time by ~60%.
- Engineered OCR and NLP pipelines using Tesseract, PyMuPDF, and spaCy to process 10+ enterprise agreements per batch through RESTful APIs.

AI Resume Analyzer | [GitHub](#)

Completed

Express.js, Groq API, JavaScript

- Built an LLM-powered resume screening engine generating structured JSON assessments including job match scores, skill gaps, and recommendations against job descriptions, reducing screening time by ~50%.

Achievements

- Built 5 AI-powered applications serving 100+ test users across document intelligence, legal technology, and full-stack development.
- Developed production-ready RAG systems using FAISS with sub-2-second response latency on 200-page documents.
- Ranked among top participants in La Casa Hackathon and shipped a working end-to-end MVP within 24 hours.

Education

Dayananda Sagar University, Bengaluru

Bachelor of Technology (B.Tech) in Computer Science & Engineering

Graduation: 2027

CGPA: 7.59/10

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Artificial Intelligence, Machine Learning, Software Engineering, Object-Oriented Programming

Certifications

- AWS Cloud Practitioner Essentials – Amazon Web Services, 2024
- Artificial Intelligence Fundamentals – IBM, 2024
- Advanced Prompt Engineering with ChatGPT – upGrad Education Private Limited, February 2026

Languages: English (Professional), Hindi (Fluent), Kannada (Native) | **Interests:** Artificial Intelligence, Deep Learning, Generative AI, Cybersecurity, Product Development
