

U.M. DEEKSHITH GOWDA

Generative AI Engineer · Full-Stack MERN Developer

+91 7892879860 | gdeekshith80@gmail.com

Portfolio | github.com/deekshith-8 | linkedin.com/in/deekshithg1206

Professional Summary

Computer Science undergraduate specializing in Generative AI and full-stack development. Experienced building production RAG pipelines, REST APIs, and MERN applications end to end. Strong foundation in Data Structures, Algorithms, OOP, and Software Engineering principles. Seeking AI/ML internship roles at the intersection of LLMs and real-world product engineering.

Technical Skills

AI & GenAI: LLM Development, RAG Pipelines, Vector Search, FAISS, LangChain, Prompt Engineering, Groq API, OpenAI API, HuggingFace, spaCy, NLP, Embedding Models

Full-Stack: React, Next.js, Node.js, Express.js, FastAPI, Flask, MERN Stack, Vite, TailwindCSS, REST API Development, Microservices, JWT Authentication

Languages & CS: Python, JavaScript, TypeScript, Java, C | OOP, Data Structures & Algorithms, System Design

Databases: MongoDB, PostgreSQL, Supabase

Vector Databases & Search: FAISS, Embeddings, Semantic Search

Cloud & DevOps: AWS (EC2, S3), Docker, Vercel, Render, GitHub Actions, CI/CD, Linux, Postman, Agile, Git Workflow

Core Projects

DocMind AI | GitHub Completed
LangChain, FAISS, HuggingFace, Groq, LLaMA 3.3, Streamlit

- Built end-to-end RAG platform for citation-backed Q&A over long-form PDFs; reduced manual review time by ~70% for test users.
- Integrated FAISS vector retrieval + Groq-hosted LLaMA 3.3 (70B) with custom semantic chunking, improving answer relevance ~40% over baseline.

RedTape | GitHub Active
Next.js, FastAPI, Gemini 2.5 Flash, spaCy, PyMuPDF

- Co-developed AI legal document analysis platform automating contract review and clause extraction, cutting review time by ~60%.
- Engineered custom OCR + NLP pipelines (Tesseract, PyMuPDF, spaCy) handling 10+ enterprise agreements per batch via REST API.

AI Resume Analyzer | GitHub · Live Demo Completed
Node.js, Express.js, Groq API, JavaScript

- LLM-powered engine generating structured JSON assessments (match score, skill gaps, recommendations) against JDs via Groq API; cut screening time by ~50%.

CineMovie | GitHub · Live Demo Completed
React, TMDB API, JWT, Google OAuth, TailwindCSS

- Responsive movie discovery platform with TMDB REST APIs, JWT auth, Google OAuth, watchlist, and OTT provider info.

Nestly | GitHub Active
Next.js 15, TailwindCSS, Gemini AI, TypeScript

- Built an AI-powered portfolio generator using Next.js 15 and Gemini AI with live preview, 5 themes, 3 layout modes, and one-click HTML export.
- Automated portfolio generation workflow with GitHub Actions CI/CD on Vercel, reducing setup time from hours to minutes.

Achievements

- Built 5 AI-powered applications serving 100+ test users across document intelligence, legal-tech, and full-stack domains.
- Developed production-ready RAG systems using LangChain and FAISS with sub-2s latency on 200-page documents.
- Ranked among top participants in La Casa Hackathon; shipped a working MVP end-to-end within 24 hours.
- Maintainer of Nestly — open-source portfolio generator enabling CS students to deploy a portfolio in under 10 minutes.

Education

Dayananda Sagar University, Bengaluru Graduation: 2027
Bachelor of Technology (B.Tech) in Computer Science & Engineering CGPA: 7.36/10

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Artificial Intelligence, Machine Learning, Software Engineering, Object-Oriented Programming

Certifications

- AWS Cloud Practitioner Essentials — Amazon Web Services, 2024
- Artificial Intelligence Fundamentals — IBM, 2024
- Prompt Engineering — upGrad, 2024
